TO OUR FRIENDS

As the close of 1932 draws near, it seems to us that certain conclusions, which were quite evident in 1931, can most certainly be drawn for the future. Apple trees of such varieties as are not desired by the public, and of such age or condition that good fruit cannot be grown are a liability and likely to remain so. Nearly all of our former old "standby" varieties in peaches (we except Hale and Elberta) are no longer wanted. The sooner such varieties and trees are removed, the better for the grower and his markets. New and better varieties are frequently being introduced. It has been our policy not to propagate such varieties until their value has been pretty definitely determined and while, with peaches especially, better varieties probably will be introduced in the future, we feel that those we offer are as good as can be obtained at present.

In spite of our extremely low prices, we have spared no efforts to have our stock well grown and true to name. The issuing of this abbreviated catalogue does enable us to make quite a saving in advertising, which, together with the fact that we have no salesmen reflected in this year's low prices.

With many thanks for the good business given us in the past by a constantly increasing clientele, we respectfully solicit your business again, at a time when it will be more than ever appreciated.

CERTIFICATION

Our experience in the past has been that few people are willing to pay the additional cost of having seals put on to certify trees. However, we are still continuing our practice of having the trees inspected by Dr. J. K. Shaw of Amherst, Mass., nationally known as the originator of identification of apple trees by their leaf characteristics. Dr. Shaw's statement of inspection for Spring 1933 follows:

Amherst, Mass.,  
August 26, 1932.

TO WHOM IT MAY CONCERN:

This is to certify that I have examined for trueness to name all the salable apple stock now growing in the nurseries of the Wallingford Nurseries of Wallingford, Connecticut, and that, as they now stand in the nursery row, all trees are, to the best of my knowledge and belief, true to name.

J. K. Shaw.

NON-WARRANTY

We strive to avoid mistakes, but in the event that any nursery stock sold by us should prove untrue to the label under which it is sold, provided notice and proper proof are furnished to the seller, the seller shall, at the option of the buyer, either refill that portion of the order which was mislabeled, by another delivery of stock or refund the purchase price. But in any case the seller is not to be held responsible for a sum greater than the original selling price of such stock. All sales or agreements to sell are made subject to shortage of nursery stock from fire, frosts, drought, or other causes beyond control of the sellers.

APPLICATION OF PRICES

Customers may select 5 of any kind of fruit such as 5 peach at the 10 rate, 35 at the 100 rate, 350 at the 1000 rate.

MINIMUM ORDER

On account of the cost of handling orders, please make orders for not less than \$1.00.

DISCOUNT

5% discount may be deducted on all orders where the total amount is remitted with the order and this is sent before April 1st.

SIZE OF TREES

Caliper or diameter governs the size of all fruit trees except 1-year apple. Height is only approximate.

New Salem, Mass., May 25, 1932.

Received the apple trees in good condition and they were fine trees; the best we have bought.

Yours truly, Mrs. D. A. Stowell.

STANDARD APPLE TREES

Permanent apple trees should be planted from 36 to 40 ft. apart. Filler varieties which bear young and consistently, such as Wealthy, Wagener, Yellow Transparent, or Rome Beauty, and also peach trees where land and climate are suitable, may be planted between, making the distance 18 to 20 ft. The filler trees will carry along the permanent trees so that when it is necessary to take out part, the cost of growing those remaining will have been paid by the younger, quicker bearing varieties.

The trees begin to crowd, by taking out every other tree, they will be left about 28 ft. apart diagonally and, in later years, again taking out every other tree, will leave them 40 ft. apart. Thus for 25 to 30 years the land will be returning an extra crop before the permanent trees need the room.

We wish also to call attention to our 6-year old apple trees. They have been transplanted, making it possible for us to dig them with good roots. Many of these trees have borne apples in the nursery row, and will save the grower much time. We recommend them especially to home planters. Supplied only in varieties starred.

	Each	Ten	100
6 yr., 1 1/2 in. cal. 8-10 ft. (in varieties starred)	\$1.50	\$13.50	\$115.00
6 yr., 2 in. cal. and up, 9-12 ft. (in varieties starred)	2.00	17.50	150.00
2 yr., 1 1/2 in. cal. and up, 5-7 ft. ....	.50	3.50	20.00
2 yr., 1 1/2 in. cal. 4-6 ft. ....	.40	2.50	17.50
2 yr., 1 1/2 in. cal. 3 1/2-5 ft. ....	.30	2.00	12.50
2 yr., 1 1/2 in. cal. 3-4 ft. ....	.20	1.50	10.00
1 yr., 4-5 ft. ....	.40	2.50	17.50
1 yr., 3-4 ft. ....	.30	2.00	12.50
1 yr., 2-3 ft. ....	.20	1.50	10.00

Exceptions: Dwarf Baldwin, McIntosh, Cortland 1 1/2 in. cal. 10¢ extra. Macoun in 1 yr. stock only. 5¢ each extra. Red Strain Delicious in 1 yr. stock only. 10¢ each extra.

\*Baldwin. Large, red, winter apple. Known by all. The only one of the older varieties which the 1925 New England survey showed would not exceed 1925 production in 1935.

\*Cortland. Very similar to McIntosh in flavor. Larger, darker red, ripens two weeks later, hangs to tree better, and well worth planting.

\*Delicious. Large, red, fancy table winter apple. Red Strain Delicious. For the first time we offer the so-called "Blond Red" strain of Delicious, most of which are double worked on McIntosh. This strain is the bright red type, colors early and we cannot too highly recommend it. In 1 yr. stock only at 10¢ each extra.

\*Duchess. Striped red. Early August. Following Red Astrachan.

Early McIntosh. A cross between McIntosh and Yellow Transparent. Originated at Geneva Experiment Station, New York. The fruit is very similar to McIntosh in all respects, ripening after Yellow Transparent. Tree is a good thrifty grower and bears annually.

Fall Pippin. Well known Fall variety.

Galla Beauty (Red Rome Beauty). Generally considered to be the best red strain of Rome Beauty. Most of our trees are double worked on McIntosh. We offer these for the first time at regular prices. In 1 yr. stock only.

\*Gravenstein. Large, striped, red. Red Gravenstein. (Washington strain.) Originated in the State of Washington—said to be the very best strain of Red Gravenstein, similar to Gravenstein, but a much darker red.

\*King. A very large, red Fall apple. Fine for table use and baking. Supplied only in 6 yr., 8-10 ft. size.

Macoun. (Description by New York Fruit Testing Association, Geneva, New York.) 1 yr. only, 5¢ each extra.

Just as Early McIntosh advances the season for the McIntosh type of apple, Macoun produces a late crop of these red-skinned, white-fleshed, richly flavored, aromatic apples. The season of Macoun is from one to two months later than that of McIntosh with Cortland midway between. In shape, the fruits of Macoun are similar to those of McIntosh; the color is a darker red, less striped, and with a heavier bloom; the flesh is much the same in color, texture, flavor and aroma. The trees bear regularly and heavily. This promises to be an apple of great merit coming in, as it does, long after all other McIntosh-like apples are out of season.

McIntosh. McIntosh may well be called the King of Apples for New England and vicinity. September.

Meiba. One of the newer varieties. Similar to Duchess in season and markings, but better quality and larger.

Milton. (Description by New York Fruit Testing Association, Geneva, New York.)

Milton is a sister of Early McIntosh which ripens its crop a month later. Its main value is that it is a McIntosh type which ripens before McIntosh. The tree is vigorous but not as large as that of Early McIntosh. The fruits are covered with a very pinkish red and heavy bloom. The flesh is white, tender, crisp, juicy, and of McIntosh flavor and aroma.

\*Northern Spy. Well known early Winter, red variety.

\*Opalescent. Very large, red apple. Fall.

Red Astrachan. Best, early red apple. August 1st.

Red Spy. A sport of Northern Spy. Similar in all respects to Northern Spy except in coloring in which it much surpasses its parent, having a solid red.

Red Rome Beauty. See Gallia Beauty.

\*R. I. Greening. Fine dessert variety. Early Winter.

Rome Beauty. Late, red Winter apple. Very productive.

Roxbury Russet. Very late Winter russet apple.

\*Stark. Large, red, late Winter. Very productive. 6 yr. trees only.

\*Stayman Winesap. Standard Winter apple in New Jersey. A good variety for late Winter in some sections of New England. Large, red apple.

Wealthy. Fine filler variety. Often bearing fruit in Nursery at two years of age. Red. Late August.

\*Wagener. Great filler variety. Bears young. Red, early Winter.

Williams Red. Summer apple. Following Duchess.

\*Yellow Transparent. The first early apple of importance. Fine filler variety.

\*Hyslop Crab. Very productive. Red.

Fitchburg, Mass., February 16, 1932.

Gentlemen:  
In 1924 I bought from you, fifty, two year old McIntosh red apple trees which were very satisfactory.

Yours truly, D. Frank Dillon.

PEACHES (SPRING DUG)

For several years, we have practiced spring digging of our peach trees. This has always given us a perfect lot of trees which cannot help giving satisfaction. Probably with no kind of fruit is such a radical change of varieties taking place. We are attempting to keep abreast of the times and offer several of the newer introductions, some of them for the first time.

On account of our peach trees being in the field we will not have an accurate grade count until spring, which may make a substitution of sizes necessary in certain instances, but we hope not. Order early and have the trees reserved. Plant 18 to 20 ft. apart.

PRICES (Except as noted)

	Each	Ten	100
1 1/2 in. cal. and up, 5-7 ft. (Extra large grade)	\$0.50	\$3.50	\$25.00
1 1/2 in. cal. 4-6 ft. Standard No. 1 grade	.40	2.50	15.00
1 1/2 in. cal. 3 1/2-5 ft.	.30	2.00	12.50
1 1/2 in. cal. 2 1/2-4 ft.	.20	1.50	10.00
2-3 feet	.15	1.00	7.50
1 1/2-2 ft.	.10	.75	5.00

TIME OF RIPENING IS FOR CONNECTICUT CONDITIONS

Greensboro. August 1st. Medium size. White flesh. Very productive.

Arc Beauty. August 3rd. Medium size. Yellow flesh. Very productive. Extra fine quality.

Mikado (June Elberta). August 3rd. Very similar to Arc Beauty but having a little better texture of flesh. 5¢ extra on 3 largest sizes.

Buttercup. August 5th. Very similar in appearance to Arc Beauty but larger. Yellow and very handsome. 5¢ extra on 3 largest sizes.

Marigold. August 8th. A New Jersey introduction, yellow, semi-free

which fills in a season where there is usually a slight break. 5¢ extra on 3 largest sizes.

Oriole. August 10th. A New Jersey introduction, nearly free, yellow

and starts to ripen just ahead of Golden Jubilee. 5¢ extra on 3 largest sizes.

Carman. August 15th. Medium to large. White. Very hardy variety.

Cumberland. August 15th. Recommended to replace Carman. Practically free, white flesh, dark red coloring, elongated in shape, large size and good quality.

Golden Jubilee. August 13th. Here is the most outstanding introduction

of the New Jersey Experiment Station, where for years the state has

been breeding and introducing varieties better than those commonly grown.

Our own 4-year old Jubilee bore a heavy crop of fruit in 1932 which were a

Please write in the quantity, full name of variety, size or age and price. Any necessary correspondence should be written on a separate sheet.  
We do not substitute varieties in cases where an item is sold out unless requested to do so. If you wish a substitution, should we be unable to fill a portion of your order, write yes here ..... in which case we will give you the nearest we can under its proper label.

NON-WARRANTY

If any nursery stock proves untrue to the label under which it is sold, provided notice and proper proof are furnished to the buyer, the seller shall, at the option of the purchaser, either refill that portion of the order which was mislabeled, by another delivery of stock or refund the purchase price, but in any case the seller is not to be held responsible for a sum greater than the original selling price of such stock. All sales, or agreements to sell, are subject to shortage of nursery stock from fire, frost, floods, drought or other causes beyond control of the seller. Except for the aforesaid agreed liability, it is agreed that the seller, Barnes Nursery & Orchard Co. gives no warranty, either express or implied, as to description, productiveness, or any other matter of nursery stock it sells.
